

Barrel Sauna, foundation dimensions

Preparing a suitable foundation for your barrel sauna.

Example : wooden decking on a concrete foundation

Once you have selected a good location for your sauna, the next step is preparing the foundation. The base has been designed such that pressure exerted on the foundation will not be high.

Use the dimensions below to build the foundation.

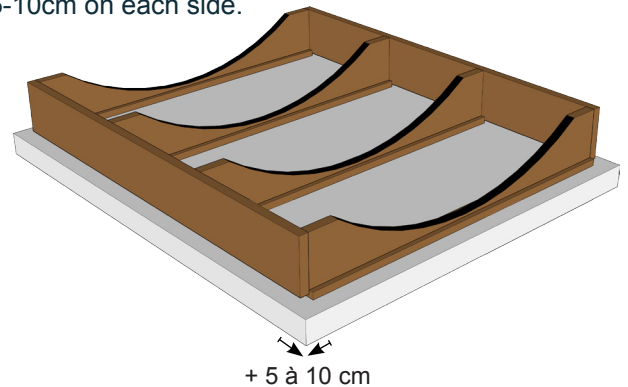

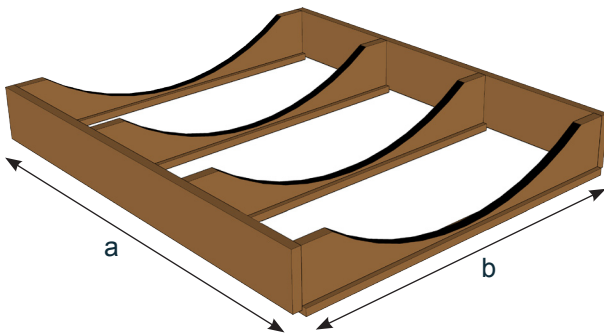

Tip: Place wooden flooring in front of the sauna to comfortably step in and out of your sauna barefooted.

Dimensions of the base

Model	a (cm)	b (cm)
Barrel Sauna 7ft	185	160
Barrel Sauna 8ft	215	160

Minimum dimensions of the foundation

Make the foundation a bit larger than the base, eg 5-10cm on each side.

Suitable foundation materials

1. concrete slab, thickness +/- 10cm
2. stone tiles
3. stamped dolomite
4. wood decking
