

Preparing electric and water supply for a hot tub with a spa system.

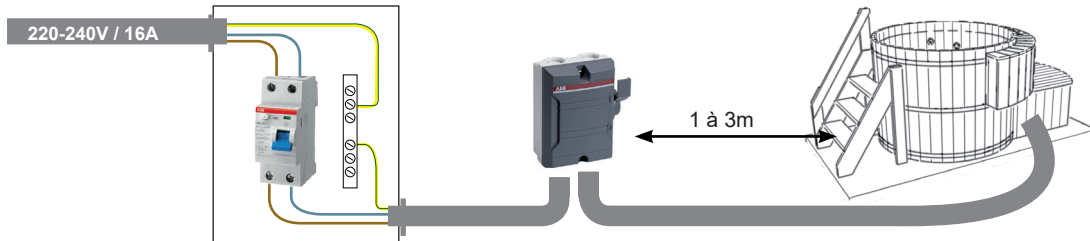

ELECTRIC

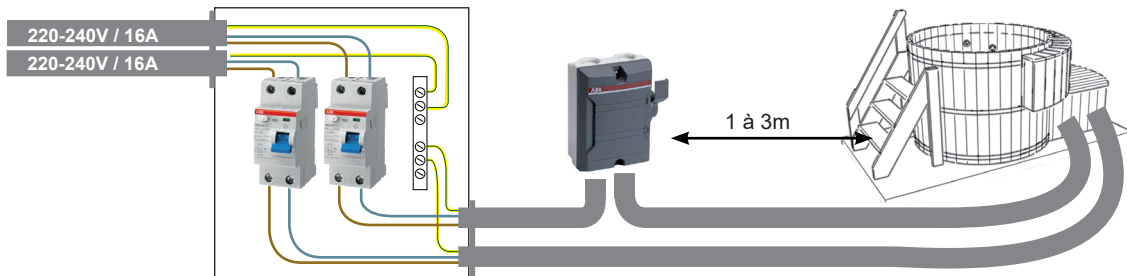

IMPORTANT

All electrical work must be performed by a qualified electrician and must conform to all local codes.

Option 1: Spa System 3kW

Option 2: Spa System 3kW + auxiliary heater 3kW

Not included

Power supply cable
3G2.5mm insulated

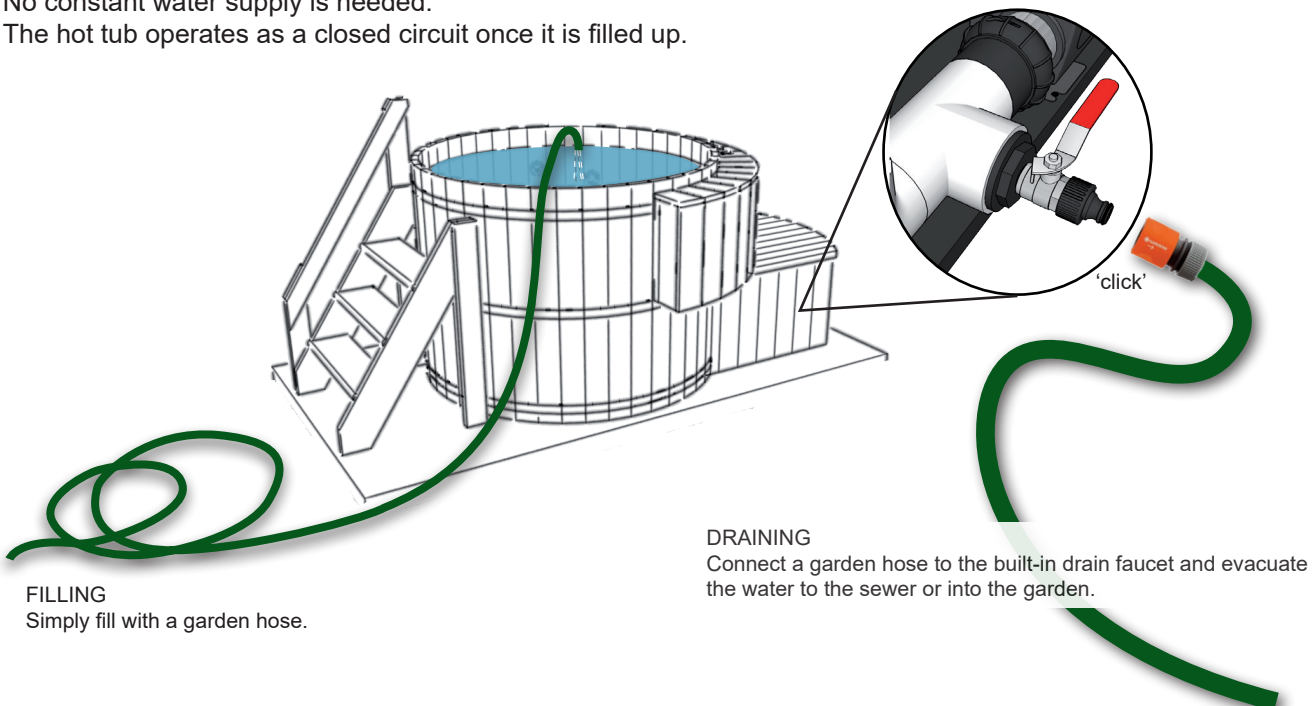

Ground Fault Interruptor
ABB F202 A-25/0.03 or similar

Optional ON/OFF switch
ABB BW240DP or similar

WATER

No constant water supply is needed.
The hot tub operates as a closed circuit once it is filled up.

FILLING
Simply fill with a garden hose.

DRAINING
Connect a garden hose to the built-in drain faucet and evacuate the water to the sewer or into the garden.
